### Editorial Review

From Publishers Weekly

Syed, sportswriter and columnist for the London *Times*, takes a hard look at performance psychology, heavily influenced by his own ego-damaging but fruitful epiphany. At the age of 24, Syed became the #1 British table tennis player, an achievement he initially attributed to his superior speed and agility. But in retrospect, he realizes that a combination of advantages—a mentor, good facilities nearby, and lots of time to hone his skills—set him up perfectly to become a star performer. He admits his argument owes a debt to Malcolm Gladwell's *Outliers*, but he aims to move one step beyond it, drawing on cognitive neuroscience research to explain how the body and mind are transformed by specialized practice. He takes on the myth of the child prodigy, emphasizing that Mozart, the Williams sisters, Tiger Woods, and Susan Polgar, the first female grandmaster, all had live-in coaches in the form of supportive parents who put them through a ton of early practice. Cogent discussions of the neuroscience of competition, including the placebo effect of irrational optimism, self-doubt, and superstitions, all lend credence to a compelling narrative; readers who gobbled up *Freakonomics* and *Predictably Irrational* will flock to this one.
