## **Corporations, Crime and Accountability (Theories of Institutional Design)**

By Brent Fisse, John Braithwaite

This book explains why accountability for corporate crime is rarely imposed under the present law, and proposes solutions that would help to extend responsibility to a wide range of actors. The authors develop an Accountability Model under which the courts and corporations work together by having the law harness the internal disciplinary systems of organizations. In this way accountability would be achieved across a much broader front than would otherwise be possible.
