Renewable Energy Finance: Powering the Future By Charles W Donovan

The future of clean energy is no longer about science and technology; it's all about access to finance. The fossil fuel industry has been subsidized for decades with tax breaks and government backing, while renewables have struggled to compete. But now clean energy is the safe bet for investors, as is argued in *Renewable Energy Finance: Powering the Future*, edited by Dr Charles Donovan, Principal Teaching Fellow at Imperial College Business School.

With a foreword by Lord Brown and contributions from some of the world's leading experts in energy finance, this timely book documents how investors are spending over US\$250 billion each year on new renewable energy projects and positioning themselves in a global investment market that will continue to expand at double-digit growth rates until 2020. It documents first-hand experiences of the challenges of balancing risk and return amid volatile market conditions and rapid shifts in government policy.

Renewable Energy Finance provides an insider's perspective on renewable energy transactions, and insight into how countries like the US, India and China are responding to the global energy challenge. Drawing together contributions from senior executives and leading academics, *Renewable Energy Finance* serves an audience of readers craving intelligent, practical perspectives on the future of clean energy investment.

Readership: Advance economics undergraduates and postgraduates undertaking modules in Environmental and Energy economics. Finance students undertaking Energy Finance modules. Researchers and interested financial professionals looking for a reference volume on clean energy investing.

Editorial Review

From the Inside Flap

Renewable Energy Finance describes in rich detail current best practices and evolving trends in clean energy investing. With contributions from some of the world's leading experts in energy finance, the book documents how investors are spending over US\$200 billion each year on financing renewable energy and positioning themselves in a global investment market that will continue to expand at double-digit growth rates through the end of the decade. The book describes with first-hand experiences the challenges of "keeping the lights on" amid rising conventional energy prices and looming environmental risks. Chapters describe project financing vehicles for a range of renewable energy technologies including solar photovoltaic power plants, offshore wind farms, and bio-fuel refineries, as well as financing practices in a diverse set of countries such as the United States, the United Kingdom, India, and China. The book gives readers a unique insiders' perspective on how renewable energy deals actually get done, and is a go-to reference manual for understanding how to fund investment projects in renewable energy. Drawing together contributions from senior executives and academic thought-leaders, Renewable Energy Finance will serve an audience of readers craving a practitioner's perspective that avoids industry clichés, self-promotion, and grandstanding.

About the Author

Charles Donovan is Principal Teaching Fellow at Imperial College Business School in London. He was most recently Head of Structuring and Valuation for Alternative Energy at BP plc, where he was responsible for investment evaluation and project financings in North America, Europe, and Asia. He began his career as an Energy Policy Analyst with the US Environmental Protection Agency during the Clinton Administration and subsequently worked for the Enron Corporation. His experience includes several years in private sector consulting, advising national governments and multinational energy companies on the impacts of governmental policy on investment. Dr Donovan holds a BA in Psychology from the University of Washington, a MBA from Vanderbilt University, and a DBA in Management from IE Business School.

Users Review

From reader reviews:

Diane Gonzales:

Here thing why this specific Renewable Energy Finance: Powering the Future are different and trustworthy to be yours. First of all studying a book is good nevertheless it depends in the content from it which is the content is as tasty as food or not. Renewable Energy Finance: Powering the Future giving you information deeper and in different ways, you can find any publication out there but there is no guide that similar with Renewable Energy Finance: Powering the Future. It gives you thrill reading through journey, its open up your personal eyes about the thing that happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your technique home by train. If you are having difficulties in bringing the published book maybe the form of Renewable Energy Finance: Powering the Future in e-book can be your choice.

Ruth Frye:

Why? Because this Renewable Energy Finance: Powering the Future is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will distress you with the secret the idea inside. Reading this book beside it was fantastic author who write the book in such incredible way makes the content within easier to understand, entertaining technique but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This book will give you a lot of advantages than the other book have such as help improving your skill and your critical thinking way. So , still want to hesitate having that book? If I were you I will go to the publication store hurriedly.

John Yang:

Within this era which is the greater individual or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple method to have that. What you should do is just spending your time little but quite enough to experience a look at some books. Among the books in the top record in your reading list will be Renewable Energy Finance: Powering the Future. This book that is certainly qualified as The Hungry Mountains can get you closer in getting precious person. By looking right up and review this e-book you can get many advantages.

Manuel Frazier:

A number of people said that they feel bored when they reading a reserve. They are directly felt this when they get a half elements of the book. You can choose the book Renewable Energy Finance: Powering the Future to make your own personal reading is interesting. Your personal skill of reading skill is developing when you just like reading. Try to choose basic book to make you enjoy to read it and mingle the sensation about book and reading especially. It is to be initially opinion for you to like to open up a book and go through it. Beside that the reserve Renewable Energy Finance: Powering the Future can to be your new friend when you're really feel alone and confuse using what must you're doing of the time.
