Editorial Review

About the Author

Jonathan Wong Jong Hann is an avid puzzle solver. He is constantly in search of new problems to take apart. He has dabbled in Rubik's Cubes, maze navigation algorithms, and various other logical and mechanical puzzles. He had taken apart OFBiz within a month for a client who wanted to evaluate it. Having mapped out the architectural structure of OFBiz, he also embarked on documenting the functional and ERP-specific aspects of OFBiz. Within the following six months, he had completed three small-scale projects with OFBiz. He is currently using OFBiz in almost every new project, leveraging OFBiz's advantage for rapid prototyping and development. He first delved into Java some 10 years ago. He has since specialized in clean programming structures, design patterns, and parallel computing. Since then, he also picked up the hobby of reverse engineering various open source software to equip his employers and himself with new technologies. Jonathon has also worked for his employers and himself with new technologies. Jonathon has also worked for Rupert Howell, while developing Java applications for the UK's Office for National Statistics, stumbled upon Open For Business and has been working with the framework ever since. Since early 2003, Rupert has been a consultant to some of the UK's largest OFBiz implementations and has helped some major retailers successfully migrate their entire ERP systems to OFBiz. Rupert holds a Master's degree in Mechanical Engineering and is a Director of Provolve Ltd, a company specializing in OFBiz-based solutions. For more information see the Provolve website at www.provolve.com.

Users Review

From reader reviews:

William Petterson:

In other case, little men and women like to read book Apache OFBiz Development: The Beginner's Tutorial. You can choose the best book if you love reading a book.
