Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX

By Nirav Mehta

Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX By Nirav Mehta

Mobile Web Development shows you how to build a mobile presence for your web applications and sites. It covers targeting different mobile web browsers, sending and receiving SMS and MMS messages, accepting mobile payments, and developing voice- and touchtone-response systems. This book is for web developers who want to provide mobile support for their applications. The book assumes some knowledge of HTML, CSS, and JavaScript. The reader should also know a server-side language. The examples in the book use PHP, but can be adapted easily to other languages. The book does not use J2ME, focusing instead on using the phone's web browser and other standard features.

Users Review

From reader reviews:

Rita Heil:

In this 21st millennium, people become competitive in each and every way. By being competitive now, people have do something to make these survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yeah, by reading a guide your ability to survive boost then having chance to stand than other is high. In your case who want to start reading some sort of book, we give you this Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX book as nice and daily reading publication. Why, because this book is more than just a book.

Eileen Moore:

Typically the book Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX has a lot associated with on it. So when you make sure to read this book you can get a lot of advantage. The book was written by the very famous author. The author makes some research prior to write this book. This book very easy to read you can get the point easily after looking over this book.

Alberto Turcotte:

Can you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you find out the inside because don't determine book by its cover may doesn't work at this point is difficult job because you are afraid that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer could be Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX why because the excellent cover that make you consider about the content will not disappoint you actually. The inside or content is definitely fantastic as the outside or cover. Your reading 6th sense will directly assist you to pick up this book.

Monique Hightower:

As a college student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their passion. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that looking at is not important, boring along with can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Mobile Web Development: Building mobile websites, SMS and MMS messaging, mobile payments, and automated voice call systems with XHTML MP, WCSS, and mobile AJAX can make you experience more interested to read.
