Afforestation, Reforestation and Forest Restoration in Arid and Semi-arid Tropics: A Manual of Technology & Management By Panna Ram Siyag

The book is a comprehensive manual of practice for execution of afforestation and tree planting programmes in arid and semi-arid tropics. It includes a compact running account of the technology of afforestation and the relevant principles and practices in management of afforestation projects. It provides a wide range of structured information and a number of model designs which can be gainfully put to use by the field level supervisors as also by the managers concerned with planning and control of such projects. Written by a practising specialist, the book is invaluable for anyone concerned with the practice of afforestation and tree planting, be he a tree hobbyist or a school teacher, a professional forester or a senior policy maker in government, an industrialist or a philanthropist, an environmental activist or a member of a community service organization.

Editorial Review

From the Back Cover

This groundbreaking work offers a practical manual for implementing afforestation and reforestation programs in the arid and semi-arid tropics. The comprehensive text covers both the technical and managerial aspects of afforestation and reforestation, and includes model engineering and organizational designs.

The book is intended for professionals engaged in planning, monitoring, and coordinating afforestation and reforestation programs, as well as for field supervisors responsible for implementing those programs. It will also serve as a valuable reference guide for planners and policymakers in governments and donor agencies concerned with natural resource management, watershed development, and community development.

Students and teachers of forestry at universities, colleges, and professional training institutions will also find it a valuable resource.

The book offers extensive content on the technology of afforestation and reforestation. It presents structured information in the form of charts, tables, figures, photographs, and model engineering designs that can be applied directly in planning new programs as well as monitoring the tasks and activities involved in carrying them out. It can be used as a field manual, a productivity enhancement tool, and a quality assurance tool for workers and managers alike.

The book was conceived, designed, and written by a highly qualified author with many years of practical experience in the implementation of afforestation and reforestation projects. His background in engineering and forestry has led to a multidisciplinary systems approach that is both unique and invigorating. The book incorporates five years' painstaking work in planning and converting carefully researched data into structured information and practical designs.

Users Review

From reader reviews:

Nancy Farley:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite book and reading a reserve. Beside you can solve your problem; you can add your knowledge by the guide entitled Afforestation, Reforestation and Forest Restoration in Arid and Semi-arid Tropics: A Manual of Technology & Management.
