Management of Transportation , 6th Edition (English Version) By John J. Coyle , Robert A. Novack Edward J. Bardi

The Transportation Economics and Management module has three primary areas of emphasis: (1) application of demand, cost, and pricing principles to transportation; (2) the operating, service and financial characteristics of the various modes and types of transportation; and (3) managerial issues in transportation. The objectives for the transportation economics and management module provide an understanding of: 1. The relationship and cost trade-offs occurring between transportation and other logistics functions; 2. How the operating and service characteristics of each mode affect cost, performance, and the products moved; 3. The economic principles that provide a foundation for transportation costing and pricing; 4. Shipper and carrier strategies employed to reduce costs and improve performance.
