Quick Reference Handbook for Surgical Pathologists By Natasha Rekhtman, Justin A. Bishop

This book is a compilation of high-yield, at-a-glance summaries of immunohistochemistry, special stains, grading systems, molecular markers, tumor syndromes, and selected morphologic and clinical references. It is intended for use as a quick reference or "peripheral brain" while at the microscope (or when cramming for the boards). The book has a unique, easy-to-navigate format: tables and diagrams accompanied by brief, to-the-point explanatory text. The authors are early-career pathologists who compiled this book for pathologists-in-training, but the information will be equally relevant to the practicing pathologist.

Editorial Review

From the Back Cover

This book is a compilation of high-yield, at-a-glance summaries for various topics on which pathologists frequently need information in a quick reference format while at the microscope (or when cramming for the boards). The authors are early-career pathologists who have compiled this book from the perspective of pathologists-in-training. The focus is not organ-based histologic criteria, but rather everything else that goes into pathologic diagnoses but is difficult to keep committed to memory. The emphasis is on immunohistochemistry, special stains, grading systems, molecular markers, tumor syndromes, and helpful clinical references. Also included are morphologic summaries that encompass high-yield material cutting across all organ systems, such as an illustrated guide for microorganisms, tumor differentials, and an illustrated glossary.

The book has a unique format in that the information is presented primarily in tables and diagrams accompanied by minimal explanatory text. The guiding principle was to boil the information down to the essentials but with just enough commentary to be accessible to a newcomer to pathology. This book is intended to serve as a ‘peripheral brain’ for pathology residents where frequently needed information is readily accessible and easy to navigate. The book may also be of interest to practicing pathologists as a quick reference by the microscope.

About the Author

Natasha Rekhtman, MD, PhD is an Assistant Attending in the Department of Pathology at Memorial Sloan-Kettering Cancer Center, New York.

Justin A. Bishop, MD, is an Assistant Professor in Surgical Pathology at The Johns Hopkins Medical Institutions, Baltimore.

Users Review

From reader reviews:
