**Chemical Dependency: A Systems Approach (4th Edition)** By C. Aaron McNeece, Diana M. DiNitto

*Comprehensive presentation of substance abuse with the most recent issues in epidemiology, etiology, substance abuse policy, and treatment.*

The book looks at substance abuse from a systems perspective. It presents all major theories of addiction, as well as the major physiological and psychological results of substance abuse, including fetal alcohol syndrome.

Coverage of the latest developments in treatment (including pharmacological approaches), recent research on treatment outcomes, and a comprehensive discussion of etiological theories, including genetics, is included. This edition contains an up-to-date discussion of the most recent trends in designer drugs to help explain the considerable frequency of changes in which drug use patterns occur.

## Learning Goals

Upon completing this book, readers should be able to:

- Understand at-risk drinking and substance disorders, including how to identify these problems, how to intervene once they have been identified, and how to make referrals
- Identify approaches to help clients avoid or address substance use disorders
- Examine current information on the most rigorous scientific studies of treatment effectiveness
- Trace the development of new medication-assisted treatments

## **Editorial Review**

### **From the Back Cover**

Substance abusers affect everyone they come into contact with, and state and federal policies regarding substance control seem to change constantly. This book takes a comprehensive look at substance abuse from a systems perspective, which makes it particularly appropriate for social workers who are accustomed to a "person-in-environment" perspective. This book covers all the major theories of addiction, as well as the major psychological and physiological results of substance abuse, including fetal alcohol syndrome. Social workers, therapists, drug and alcohol counselors.

### **About the Author**

**C. Aaron McNeece** was a social work educator for 34 years, after working as a correctional social worker. He has conducted extensive research on both substance abuse and criminal justice issues. He served for 10 years as the director of the Institute for Health and Human Services Research at Florida State University, where he was also the Walter W. Hudson Professor of Social Work and later, Dean of the College of Social Work. He is currently Professor and Dean Emeritus.

**Diana DiNitto** is Cullen Trust Centennial Professor of Alcohol Studies and Education and Distinguished Teaching Professor at the University of Texas at Austin where she teaches courses in social welfare policy, alcohol and drug problems, research, and pedagogy. She has a MSW degree and a Ph.D. in government from Florida State University. She has worked in a detoxification center, halfway house, and outpatient chemical dependency treatment program. She is also coauthor of *Chemical Dependency: A Systems Approach, 4th ed.* (Pearson, Summer 2011) and *Social Work: Issues and Opportunities in a Challenging Profession, 3rd ed.* (Lyceum Books, 2008). Her research in on substance abuse, violence against women, and social welfare policy. Dr. DiNitto has served on the boards of the Council and Social Work Education, the Association of Medical Education and Research on Substance Abuse, and the Texas Research Society on Alcoholism. She currently chairs the NASW Press Book Committee. She has been a visiting professor at the University of Hawaii at Manoa, University of Illinois at Urbana-Champaign, and the University of Sydney (Australia). Recently she gave the Robert J. O'Leary Memorial Lecture at Ohio State University entitled "Ending America's Ambivalence in the War on Drugs" and presented invited testimony on drug policy to the United States Sentencing Commission.
