Chemistry: The Science in Context (Third Edition) By Thomas R. Gilbert, Rein V. Kirss, Natalie Foster, Geoffrey Davies

Designed to help today's students connect chemistry to their world, see that world from a molecular point of view, and become expert problem solvers.

All general chemistry students face similar challenges but they use their textbook to meet those challenges in different ways. Some read chapters from beginning to end, some consult the book as a reference, and some look to the book for problem-solving help. *Chemistry: The Science in Context*, Third Edition was written and designed to help every kind of student, regardless of how they use the book.

Editorial Review

About the Author

Thomas R. Gilbert has a BS in chemistry from Clarkson and a PhD in analytical chemistry from MIT. After 10 years with the Research Department of the New England Aquarium in Boston, he joined the faculty of Northeastern University, where he is currently associate professor of chemistry and chemical biology. His research interests are in chemical and science education. He teaches general chemistry and science education courses and conducts professional development workshops for K–12 teachers. He has won Northeastern’s Excellence in Teaching Award and Outstanding Teacher of First-Year Engineering Students Award. He is a fellow of the American Chemical Society and in 2012 was elected to the ACS Board of Directors.

Rein V. Kirss received both a BS in chemistry and a BA in history as well as an MA in chemistry from SUNY Buffalo. He received his PhD in inorganic chemistry from the University of Wisconsin, Madison, where the seeds for this textbook were undoubtedly planted. After two years of postdoctoral study at the University of Rochester, he spent a year at Advanced Technology Materials, Inc., before returning to academics at Northeastern University in 1989. He is an associate professor of chemistry with an active research interest in organometallic chemistry.

Natalie Foster is emeritus professor of chemistry at Lehigh University in Bethlehem, Pennsylvania. She received a BS in chemistry from Muhlenberg College and MS, DA, and PhD degrees from Lehigh University. Her research interests included studying poly(vinyl alcohol) gels by NMR as part of a larger interest in porphyrins and phthalocyanines as candidate contrast enhancement agents for MRI. She taught both semesters of the introductory chemistry class to engineering, biology, and other nonchemistry majors and a spectral analysis course at the graduate level. She is the recipient of the Christian R. and Mary F. Lindback Foundation Award for distinguished teaching.

Geoffrey Davies has BSc, PhD, and DSc degrees in chemistry from Birmingham University, England. He joined the faculty at Northeastern University in 1971 after postdoctoral research on the kinetics of very rapid reactions at Brandeis University, Brookhaven National Laboratory, and the University of Kent at Canterbury. He is now a Matthews Distinguished University Professor at Northeastern. His research group has explored experimental and theoretical redox chemistry, alternative fuels, transmetalation reactions, tunable metal-zeolite catalysts and, most recently, the chemistry of humic substances, the essential brown animal and plant metabolites in sediments, soils, and water. He edits a column on experiential and study-abroad education in the Journal of Chemical Education and a book series on humic substances. He is a Fellow of the Royal Society of Chemistry and was awarded Northeastern’s Excellence in Teaching Award in 1981, 1993, and 1999 and its first Lifetime Achievement in Teaching Award in 2004.

Users Review

From reader reviews:

Teresa Propst:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each e-book has different aim or perhaps goal; it means that publication has different type. Some people sense enjoy to spend their a chance to read a book. They are

really reading whatever they get because their hobby is reading a book. How about the person who don't like reading through a book? Sometime, person feel need book if they found difficult problem as well as exercise. Well, probably you should have this Chemistry: The Science in Context (Third Edition).

Jesse Fox:

This Chemistry: The Science in Context (Third Edition) tend to be reliable for you who want to become a successful person, why. The reason of this Chemistry: The Science in Context (Third Edition) can be one of several great books you must have is actually giving you more than just simple reading food but feed you with information that perhaps will shock your preceding knowledge. This book is handy, you can bring it everywhere and whenever your conditions throughout the e-book and printed people. Beside that this Chemistry: The Science in Context (Third Edition) giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day activity. So , let's have it and luxuriate in reading.

Eileen Vaughan:

A lot of people always spent their very own free time to vacation as well as go to the outside with them loved ones or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read some sort of book. It is really fun for you. If you enjoy the book you read you can spent all day every day to reading a book. The book Chemistry: The Science in Context (Third Edition) it doesn't matter what good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. If you did not have enough space to deliver this book you can buy the e-book. You can m0ore very easily to read this book out of your smart phone. The price is not to cover but this book has high quality.

Henry Baker:

Chemistry: The Science in Context (Third Edition) can be one of your beginning books that are good idea. We recommend that straight away because this reserve has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining however delivering the information. The writer giving his/her effort to get every word into enjoyment arrangement in writing Chemistry: The Science in Context (Third Edition) although doesn't forget the main place, giving the reader the hottest and based confirm resource info that maybe you can be considered one of it. This great information may drawn you into brand new stage of crucial imagining.
