### Curing Cancer with Carrots By Ann Cameron

In 2013, Ann Cameron cured Stage 4 colon cancer without chemotherapy or radiation, by drinking carrot juice. Since then, others with a variety of cancers have reported similar successes. Cameron wanted to find out why such an apparently simple cancer cure--just carrots--works. Based on her extensive reading in scientific journals focused on nutrition and cancer, her ground-breaking book describes the details of the carrot treatment and the scientific evidence for its power. In this book, she shares little-known research that is revolutionizing scientific thinking about cancer and how to treat it. The research comes from the exciting new field of epigenetics--the study of how chemical switching mechanisms in our bodies change the expression of our genes. Our environment, the foods we eat, and the way we live can silence pro-cancer genes or turn them on, set anti-cancer genes on alert or turn them off. Genes aren't our destiny. Neither is cancer. Cancer develops when the body loses its ability to recognize and eliminate rogue cells--cells that take over the body if they don't quit dividing. In some cases--probably many--carrots can restore the body's natural power to regulate growth and kill defective cells. The scientific information in this book could be a life-saver and a beacon of hope for you or someone you know. Equally helpful, it offers the practical knowledge Cameron gained from her journey through cancer and back to health--how to use the internet to research proposed treatments and the quality of hospitals and doctors; how to reduce the cost of cancer care; and how to arrive at individual treatment decisions that are best for you.
