Securing Africa: Local Crises and Foreign Interventions (Routledge African Studies) From Routledge

Africa has been and currently is the site of numerous conflicts and crises. Authors previously wrote of these as specifically African problems or the problems of Europeans in Africa, but newer scholarship on other aspects of Africa has come to stress the interconnectness of Africa and the wider world. Still, it has often been limited to studies of isolated instances within African countries, with little-to-no connection to greater patterns of international power and violence. This volume explores the historical and present local and international dimensions of the myriad security crises in Africa, from the role of international relations during liberation to multination efforts against piracy.
