Editorial Review

From the Back Cover

The names Tabar and Dean are associated with high-quality mammography worldwide. In this fourth edition of the bestselling "Teaching Atlas of Mammography," readers are again invited to share in the authors experience of analyzing and evaluating mammograms. Their systematic approach not only instills a full understanding of the principles of mammography but also provides the requisite knowledge and tools to arrive at a highly accurate differential diagnosis.

Rather than starting with the diagnosis and demonstrating typical findings, the approach of this atlas is to teach the reader how to analyze the image and reach the correct diagnosis through proper evaluation of the mammographic signs. Prerequisites for the perception and evaluation of the mammographic findings are optimum technique, knowledge of anatomy, and understanding of the pathological processes leading to the mammographic appearances.

Special features: Revised and expanded case studies, based on 40 years of imaging experience, provide instructive long-term follow-up of patients over a period of up to 25 years Offers a unique comparison of imaging findings with the corresponding large thin-section and subgross thicksection (3D) histologic images to facilitate an understanding of the pathologic processes and the mammographic appearances they lead to Includes an abundance of coned-down compression views, microfocus magnification views, and specimen radiographs to support the analytic workup

"Teaching Atlas of Mammography" and the Breast Cancer book series by the same authors are essential for residents in radiology and practicing radiologists who need the highest level of training in the radiologic anatomy of the normal breast and the changes associated with benign and malignant lesions. They will help ensure that all clinicians acquire the optimal technique and knowledge of pathologic processes necessary to reach a correct diagnosis, and achieve the best long-term outcomes for their patients.

About the Author

Associate Professor of Pathology, University of Uppsala School of Medicine, and Chairman, Dept. of Pathology and Clinical Cytology, Central Hospital, Falun, Sweden

Users Review

From reader reviews:

William Leighty:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The information you get based on what kind of book you read, if you want drive more knowledge just go with education and learning books but if you want truly feel happy read one using theme for entertaining for instance comic or novel. Typically the Teaching Atlas of Mammography (RÖFO-Ergänzungsbände) is kind of guide which is giving the reader erratic experience.

Sherry Spears:

Information is provisions for those to get better life, information nowadays can get by anyone on everywhere. The information can be a knowledge or any news even a problem. What people must be consider while those information which is within the former life are challenging be find than now is taking seriously which one works to believe or which one the resource are convinced. If you have the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen in you if you take Teaching Atlas of Mammography (RÖFO-Ergänzungsbände) as your daily resource information.

Trevor Wright:

The e-book untitled Teaching Atlas of Mammography (RÖFO-Ergänzungsbände) is the reserve that recommended to you to read. You can see the quality of the e-book content that will be shown to you. The language that writer use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, and so the information that they share for you is absolutely accurate. You also could possibly get the e-book of Teaching Atlas of Mammography (RÖFO-Ergänzungsbände) from the publisher to make you far more enjoy free time.

Michelle Pacheco:

Playing with family in a park, coming to see the coastal world or hanging out with close friends is thing that usually you may have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Teaching Atlas of Mammography (RÖFO-Ergänzungsbände), you can enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't get it, oh come on its named reading friends.
