**The Atlantis Blueprint: Unlocking the Ancient Mysteries of a Long-Lost Civilization** By Colin Wilson, Rand Flem-Ath

## CAN ARCHAEOLOGY'S GREATEST MYSTERIES BE TRACED BACK TO THE LOST CIVILIZATION OF ATLANTIS?

The Great Pyramid. Stonehenge. Machu Picchu. For centuries, these and other sacred sites have attracted pilgrims, scholars, and adventurers drawn by the possibility that their true spiritual and technological secrets remain hidden. Who could have built these elaborate monuments? How did they do it? And what were their incomprehensible efforts and sacrifices designed to accomplish?

Now comes a revolutionary theory that connects these mysteries to reveal a hidden global pattern--the ancient work of an advanced civilization whose warnings of planetary cataclysm now reverberate across one hundred millennia. Here is startling evidence of an intelligent society dating back as much as 100,000 years--one that sailed the oceans of the world, building monuments to preserve and communicate its remarkable wisdom.

**The Atlantis Blueprint** is the authors' term for a complex network of connections between these sacred sites that trace back to Atlantis: a sophisticated maritime society that charted the globe from its home base in Antarctica...until it was obliterated by devastating global changes it anticipated but could not escape. Opening up a Pandora's box of ancient mysteries, lost worlds, and millennial riddles, **The Atlantis Blueprint** is a story as controversial, fascinating, dangerous--and inspiring--as any ever told.

### Editorial Review

From Publishers Weekly

In this pseudoscientific account, Flem-Ath, a Canadian librarian, and Wilson (Alien Dawn: An Investigation into the Contact Experience; etc.), bestselling author and New Age-y jack-of-all-trades, propose a single, geo-historical theory that links the Egyptian, Chinese and South American pyramids and other sacred sites. According to this argument, these civilizations received templates from Atlantis that contained crucial geodesic, geological and geometric information. Furthermore, Atlantean mariners, based in Antarctica, sailed the globe over 100,000 years ago and established more than 60 sacred sites around the world, such as Byblos and Jericho, to preserve the sophisticated wisdom of their culture. They erected these sites, say the authors, before geological disasters wiped out their civilization. Flem-Ath and Wilson take us on a hectic roller-coaster ride through pseudoscientific history, complete with the requisite numerology and mythology. The authors stand proudly on the shoulders of their forefathers, Charles Hapgood featured prominently among them. Before his death in 1982, Hapgood had amassed "irrefutable" proof of civilizations far more ancient than accepted archeology allows for. Flem-Ath and Wilson seem to leave no cultural, geological or paleontological stone unturned in their quest for detailed evidence, touching on everything from the origins of Freemasonry and the Ark of the Covenant, to ancient Japanese pottery in America and angels in the Book of Enoch. Frequently, they claim the interest or support of various famous people, many of whom suffered untimely deaths. Albert Einstein and John F. Kennedy, for instance, died before fully embracing earlier theories about Atlantis. For followers of mystical science, fantasy readers and conspiracy theorists, Flem-Ath and Wilson's enthusiasm and conviction will be a welcoming island in a sea of skepticism.

Veteran chronicler of history's mysteries Wilson and his cowriter Flem-Ath have come up with a new theory on Atlantis, or at least an expanded version of an old one. An intelligent society (but probably not from outer space), commonly known as Atlanteans, lived in snow-free Antarctica and left a connection of sacred sites that spans the globe. Whether the authors' theory could possibly be true is hard to divine because their evidence is so convoluted, so filled with measurements and math, geometry and geography, that it would take an Atlantean to work it all out. It doesn't help that the authors feel compelled to throw into their discourse everything but the kitchen sink: the Knights Templars, pyramids, even the Shroud of Turin make an appearance. Still, these sorts of books always generate hype and never fail to attract a solid audience. Pair it with James and Thorpe's *Ancient Mysteries* (1999), which debunks just this kind of treatment. *Ilene Cooper*

### Review

*In November 1982, Professor Charles Hapgood wrote to a young correspondent, Rand Flem-Ath, adding an amazing postscript to his life's work on ancient civilizations:*

*"There is evidence that the last displacement of the crust moved both American continents southward about 30 degrees, and absolutely devastated life and civilization on them....*

*"Furthermore, in recent exciting discoveries I believe I have convincing evidence of a whole cycle of*

*civilization in America and Antarctica, suggesting advanced levels of science that may go back 100,000 years...."*

*The idea was revolutionary. And it came from a man who had collaborated with Albert Einstein on the theory of earth crust displacement. Hapgood had discovered maps of sub-glacial Antarctica and he was on a secret quest for Atlantis. He was now telling Rand that civilization was 100,000 years old.*

*Rand Flem-Ath replied immediately, asking for some hint of Hapgood's reasons for this amazing assertion. For weeks there was no reply, then his letter was returned, stamped "deceased."*

*Hapgood's last letter led Flem-Ath to his own quest for the origin of science and civilization, of which this book tells the story....*
