Connect Access Card for Exploring Physical Geography By Stephen Reynolds, Julia Johnson, Mark Andrew Francek Professor, Peter Waylen Professor, Robert V. Rohli Professor

McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following:

- SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content.
- Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course.
- Progress dashboards that quickly show how you are performing on your assignments and tips for improvement.
- The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping.

Complete system requirements to use Connect can be found here:
<http://www.mheducation.com/highered/platforms/connect/training-support-students.html>

Editorial Review

About the Author

Stephen J. Reynolds is the author of the highly successful Exploring Geology, Stephen Reynolds is bringing his innovation and strong visual content to Exploring Physical Geography. Stephen J. Reynolds received an undergraduate degree from the University of Texas at El Paso, and M.S. and Ph.D. degrees in geosciences from the University of Arizona. He then spent ten years directing the geologic framework and mapping program of the Arizona Geological Survey, completing a new Geologic Map of Arizona. Steve currently is a professor in the School of Earth and Space Exploration at Arizona State University, where he has taught various courses about regional geology, earth resources, evolution of landscapes, field studies, and teaching methods. As a National Association of Geoscience Teachers (NAGT) distinguished speaker, he traveled across the country presenting talks and workshops on how to infuse active learning and inquiry into large introductory geology classes. He is commonly an invited speaker to national workshops and symposia on active learning, visualization, and teaching.

Mark Francek is a geography professor at Central Michigan University (CMU). Before coming to CMU in 1988, Francek earned his doctorate in geography from the University of Wisconsin-Milwaukee, his master's in geography from the University of South Carolina, and his bachelor's degree in geography and psychology from the State University College at Geneseo, New York. He has teaching and research interests in earth science education, physical geography, and soil science. Mark has pedaled twice across America and teaches biking geography field classes in around the Great Lakes region and Appalachian Mountains. He has authored and coauthored more than 30 scholarly papers, funded in part by the NSF and the State of Michigan, and has presented his research at numerous national and state conferences. At CMU, Francek has served as acting director of the Environmental Studies Program and Director of the Science and Technology Residential College.

Peter Waylen is Robin and Jean Gibson Professor of Geography at the University of Florida. He holds a B.Sc. in Geography from the London School of Economics, England, and a Ph.D. from McMaster University, Canada. He has also served as Assistant Professor at the University of Saskatchewan, visiting Associate Professor at the University of Waterloo, Canada, Hartley Visiting Research Fellow at the University of Southampton, England, and Visiting Scholar in the Department of Engineering Hydrology, University College Galway, Ireland. His teaching and research interests are in the fields of hydrology and climatology, particularly the temporal and spatial variability of risks of such hazards as floods, droughts, freezes, and heat waves, and the way in which these vary in the long run, driven by global scale phenomenon like ENSO. He has worked throughout Anglo- and Latin America, and several parts of Africa. He teaches Introductory Physical Geography, Principles of Geographic Hydrology, and Models in Hydrology, and was selected University of Florida Teacher of the Year in 2002.

Julia K. Johnson is currently a full-time faculty member in the School of Earth and Space Exploration at Arizona State University. Her M.S. and Ph.D. research involved structural geology and geoscience education research. The main focus of her geoscience education research is on student- and instructor-generated sketches for learning, teaching, and assessment in college geology classes. Prior to coming to ASU, she did groundwater studies of copper deposits and then taught full time in the Maricopa County Community College District, teaching Physical Geology, Environmental Geology, and their labs. At ASU, she teaches Introduction to Geology to nearly 1,000 students per year and supervises the associated introductory geology

labs. She also coordinates the introductory geology teaching efforts of the School of Earth and Space Exploration, helping other instructors incorporate active learning and inquiry into large lecture classes.

Robert Rohli received a B.A. in geography from the University of New Orleans, an M.S. degree in atmospheric sciences from The Ohio State University, and a Ph.D. in geography from Louisiana State University (LSU). He is currently in his 14th year at LSU, with his time divided between Faculty Director of the LSU Residential Colleges Program and Professor of Geography. Previously, he served as Assistant Professor of Geography at Kent State University (KSU) and as Regional Climatologist at the Southern Regional Climate Center. His teaching and research interests are in physical geography, particularly synoptic and applied meteorology/climatology, atmospheric circulation variability, and hydroclimatology. He has taught Physical Geography, Climatology, Meteorology, Physical Climatology, World Climates, Methods in Synoptic Climatology, Applied Meteorology, Analysis of Spatial Data, Water Resources Geography, and others.

Users Review

From reader reviews:

Joshua Shaw:

Have you spare time to get a day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a move, shopping, or went to often the Mall. How about open as well as read a book allowed Connect Access Card for Exploring Physical Geography? Maybe it is being best activity for you. You already know beside you can spend your time along with your favorite's book, you can better than before. Do you agree with their opinion or you have additional opinion?

Bobby Griffin:

Here thing why that Connect Access Card for Exploring Physical Geography are different and dependable to be yours. First of all examining a book is good however it depends in the content than it which is the content is as delicious as food or not. Connect Access Card for Exploring Physical Geography giving you information deeper including different ways, you can find any publication out there but there is no reserve that similar with Connect Access Card for Exploring Physical Geography. It gives you thrill reading through journey, its open up your own personal eyes about the thing this happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in playground, café, or even in your approach home by train. Should you be having difficulties in bringing the published book maybe the form of Connect Access Card for Exploring Physical Geography in e-book can be your alternative.

Brett Baker:

Information is provisions for folks to get better life, information nowadays can get by anyone in everywhere. The information can be a expertise or any news even a problem. What people must be consider any time those information which is within the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one the resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Connect Access Card for Exploring Physical Geography as the daily

resource information.

Reuben Beaubien:

As we know that book is essential thing to add our information for everything. By a e-book we can know everything we wish. A book is a set of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This reserve Connect Access Card for Exploring Physical Geography was filled concerning science. Spend your free time to add your knowledge about your science competence. Some people has several feel when they reading a new book. If you know how big benefit of a book, you can sense enjoy to read a book. In the modern era like right now, many ways to get book that you wanted.
