Editorial Review

Review

"...will bring the wonders of Darwin to a wide audience. [Darwin] was not only great in his time, but if anything he is even greater today." John Tyler Bonner, The Times Literary Supplement "Anyone who wishes to start the new year with a real intellectual feast will buy the four 'great books' of Darwin, published in one volume by W.W. Norton." A.N. Wilson, The Daily Telegraph

About the Author

Naturalist Charles Darwin (1809-1882) is the father of evolution. His groundbreaking *The Origin of Species* argued that all species of life have descended over time from common ancestors, and proposed the scientific theory that this branching pattern of evolution resulted from a process that he called natural selection. As much as anyone in the modern era, Darwin has changed the course of human thought.

Edward O. Wilson is widely recognized as one of the world's preeminent biologists and naturalists. The author of more than twenty books, including *The Creation*, *The Social Conquest of Earth*, *The Meaning of Human Existence*, and *Letters to a Young Scientist*, Wilson is a professor emeritus at Harvard University. The winner of two Pulitzer Prizes, he lives in Lexington, Massachusetts.
