Beyond Einstein: The Cosmic Quest for the Theory of the Universe By
Michio Kaku, Jennifer Trainer Thompson

Beyond Einstein takes readers on an exciting excursion into the discoveries that have led scientists to the brightest new prospect in theoretical physics today -- superstring theory. What is superstring theory and why is it important? This revolutionary breakthrough may well be the fulfillment of Albert Einstein's lifelong dream of a Theory of Everything, uniting the laws of physics into a single description explaining all the known forces in the universe. Co-authored by one of the leading pioneers in superstrings, Michio Kaku, the book approaches scientific questions with the excitement of a detective story, offering a fascinating look at the new science that may make the impossible possible.

Editorial Review

From Library Journal

Recently, the "superstring" theory, which asserts that all physical matter consists of extraordinarily minute vibrating strings, has been touted as the route to the long-sought unified theory of forces; some proponents call it a "theory of the universe" that will bring fundamental physics research to a closure. The first author of the present book is a researcher in the field who offers here one of the earliest superstring presentations for lay readers. The beginning chapters offer a not-very-good history of early 20th century physics, but the remainder of the work becomes livelier and more convincing as it approaches Dr. Kaku's own area of expertise. On the whole this is a fairly successful introduction to a new and exciting scientific area. Jack W. Weigel, Univ. of Michigan Lib., Ann Arbor

Review

'he does a pretty decent job of explaining some of the truly mind-boggling ideas now being kicked around by physicists: eleven-dimensional superstrings, membranes in sub-sub-atomic space, mathematical super-symmetry ... But by managing to tie up all this heavy stuff to the real-life people who dream it up, Kaku and Thompson make it an absorbing read ... after reading this book, you should be able to impress your mates by having an opinion of your very own.' Robert Matthews, *Focus*
