## Catching Fire: How Cooking Made Us Human By Richard Wrangham

In *Catching Fire*, one of the most ambitious arguments about human evolution since Darwin's *Descent of Man*, renowned primatologist Richard Wrangham makes the claim that learning to cook food was the hinge on which human evolution turned. Eating cooked food, he argues, enabled us to evolve our large brains, and cooking itself became a primary focus of human social activity?in short, cooking made us the social, intelligent, and sexual species we are today. Path-breaking and provocative, *Catching Fire* will fascinate anyone interested in our ancient origins?or in our modern eating habits.

"*Catching Fire* is convincing in argument and impressive in its explanatory power. A rich and important book." ?Michael Pollan, author of *In Defense of Food* and *The Omnivore's Dilemma*

"This is a daringly unorthodox book, and one that might just transform the way we understand ourselves." ?*Sunday Times* (UK)

"The ambition of Wrangham's theory gives it great appeal: Cooking is a powerful biological force and the universal activity around which the rest of human history?the households and tribes, the migrations and wars, the religion and science?arranged itself. But the added treat of the I-cook-therefore-I-am idea is the counterintuitive light it sheds on one of our most intense cultural preoccupations?living the right life by eating naturally." ?*Slate*

"An exhilarating book." ?*The Times* (UK)

"A cogent and compelling argument." ?*Washington Post*

"Absolutely fascinating." ?*Nigella Lawson*

## **Editorial Review**

From Publishers Weekly

Starred Review. Contrary to the dogmas of raw-foods enthusiasts, cooked cuisine was central to the biological and social evolution of humanity, argues this fascinating study. Harvard biological anthropologist Wrangham (*Demonic Males*) dates the breakthrough in human evolution to a moment 1.8 million years ago, when, he conjectures, our forebears tamed fire and began cooking. Starting with *Homo erectus*—who should perhaps be renamed *Homo gastronomicus*—these innovations drove anatomical and physiological changes that make us adapted to eating cooked food the way cows are adapted to eating grass. By making food more digestible and easier to extract energy from, Wrangham reasons, cooking enabled hominids' jaws, teeth and guts to shrink, freeing up calories to fuel their expanding brains. It also gave rise to pair bonding and table manners, and liberated mankind from the drudgery of chewing (while chaining womankind to the stove). Wrangham's lucid, accessible treatise ranges across nutritional science, paleontology and studies of ape behavior and hunter-gatherer societies; the result is a tour de force of natural history and a profound analysis of cooking's role in daily life. More than that, Wrangham offers a provocative take on evolution—suggesting that, rather than humans creating civilized technology, civilized technology created us. (*June*)

Review

### ***Publishers Weekly***

"[A] fascinating study... Wrangham's lucid, accessible treatise ranges across nutritional science, Paleontology and studies of ape behavior and hunter-gatherer societies; the result is a tour de force of natural history and a profound analysis of cooking's role in daily life."

### ***Publishers Weekly, starred review***

"[A] fascinating study... Wrangham's lucid, accessible treatise ranges across nutritional science, paleontology and studies of ape behavior and hunter-gatherer societies; the result is a tour de force of natural history and a profound analysis of cooking's role in daily life."

### ***Kirkus Reviews***

"An innovative argument that cooked food led to the rise of modern Homo sapiens.... Experts will debate Wrangham's thesis, but most readers will be convinced by this lucid, simulating foray into popular anthropology."

### ***The Harvard Brain***

"With clear and engaging prose, *Catching Fire* addresses a key and enduring scientific issue central to the quest to understand our species. It offers new insights for anyone interested in human evolution, history, anthropology, nutrition, and for everyone interested in food."

### **Edward O. Wilson, Harvard University**

"In this thoroughly researched and marvelously well written book, Richard Wrangham has convincingly supplied a missing piece in the evolutionary origin of humanity."

### **Matt Ridley, author of *Genome* and *The Agile Gene***

"Cooking completely transformed the human race, allowing us to live on the ground, develop bigger brains and smaller mouths, and invent specialized sex roles. This notion is surprising, fresh and, in the hands of

Richard Wrangham, utterly persuasive. He brings to bear evidence from chimpanzees, fossils, food labs, and dieticians. Big, new ideas do not come along often in evolution these days, but this is one."

**Steven Raichlen, author of *The Barbecue Bible* and *How to Grill*; host of *Primal Grill***

"A book of startling originality and breathtaking erudition. Drawing on disciplines as diverse as anthropology, sociology, biology, chemistry, physics, literature, nutrition, and cooking, Richard Wrangham addresses two simple but very profound questions: How did we evolve from Australopithecus to Homo sapiens, and what makes us human? The answer can be found at your barbecue grill and I dare say it will surprise you..."

**Michael Pollan, author of *In Defense of Food* and *The Omnivore's Dilemma***

"*Catching Fire* is convincing in argument and impressive in its explanatory power. A rich and important book."

***Seed Magazine***

"...makes a convincing case for the importance of cooking in the human diet, finding a connection between our need to eat cooked food in order to survive and our preference for soft foods. The popularity of Wonderbread, the digestion of actual lumps of meat, and the dangers of indulging our taste buds all feature in this expository romp through our gustatory evolution."

***Discover Magazine***

"...fascinating..."

***The New York Times***

"'Catching Fire' is a plain-spoken and thoroughly gripping scientific essay that presents nothing less than a new theory of human evolution...one that Darwin (among others) simply missed."

**Slate.com**

"Brilliant... a fantastically weird way of looking at evolutionary change."

***The San Francisco Chronicle***

"As new angles go, it's pretty much unbeatable."

***The Washington Post***

"Wrangham draws together previous studies and theories from disciplines as diverse as anthropology, biology, chemistry, sociology and literature into a cogent and compelling argument."

***Texas Observer***

"Wrangham's attention to the most subtle of behaviors keeps the reader enrapt...a compelling picture, and one that I now contemplate every time I turn on my stove."

***Providence Journal***

"Richard Wrangham presents this thesis in a concise, cogent, and accessible way."

***The New York Times Book Review***

"A new theory of human evolution – 'the cooking hypothesis' – is related in plain-spoken, gripping language."

**About the Author**

Richard Wrangham is the Ruth Moore Professor of Biological Anthropology at Harvard University. He is

coauthor of *Demonic Males*, and has been featured on NPR and in the *Boston Globe*, *New Scientist*, and *Scientific American*. He lives in Cambridge, Massachusetts.

## **Users Review**

### **From reader reviews:**

#### **Leta Welter:**

In this 21st centuries, people become competitive in every way. By being competitive currently, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yes, by reading a guide your ability to survive increase then having chance to remain than other is high. In your case who want to start reading a book, we give you this *Catching Fire: How Cooking Made Us Human* book as nice and daily reading e-book. Why, because this book is greater than just a book.

#### **Adela Valenti:**

Information is provisions for anyone to get better life, information nowadays can get by anyone with everywhere. The information can be a information or any news even an issue. What people must be consider while those information which is from the former life are challenging to be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you find the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take *Catching Fire: How Cooking Made Us Human* as the daily resource information.

#### **Bruce Parisien:**

Reading a book to become new life style in this calendar year; every people loves to examine a book. When you examine a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, such us novel, comics, along with soon. The *Catching Fire: How Cooking Made Us Human* provide you with new experience in looking at a book.

#### **Katie Grossi:**

In this age globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The particular book that recommended to you personally is *Catching Fire: How Cooking Made Us Human* this publication consist a lot of the information from the condition of this world now. This kind of book was represented how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made

some research when he makes this book. Honestly, that is why this book ideal all of you.
