Mapping the enterprise: Modelling the enterprise as services with the Enterprise Canvas By Tom Graves

For strategists, enterprise architects and others, one of the hardest tasks is we face is mapping the enterprise in a form that creates and supports a sense of the whole as a whole. And it's a task that's often made harder by the way in which so many current model-types seem only to fragment the view ever further. This book introduces an alternate approach: we create consistency at every level by modelling the enterprise as services with the Enterprise Canvas. It's a new model-type that can be used to describe just about anything in any part and at any level of the enterprise, and that acts as a consistent frame for all the other models that we need in our architectures. Yet it's also simple enough to scribble on the back of a napkin - and engage all of our stakeholders in the enterprise-scale conversations we need. Topics covered include: - how to use architecture techniques to describe any aspect of the enterprise - how to identify the business-reasons and business-value for every activity - how to align strategy, tactics and operations to enterprise vision and values - how to identify risks and opportunities in the enterprise and its market - how to link strategy and execution via enterprise models - how to improve communication between different departments and disciplines - how to use concepts of service to enhance agility, adaptability and resilience - how to enhance efficiency and effectiveness throughout the enterprise. If you want to understand and explain how your enterprise really works, this is one book you'll definitely need. Tom Graves has been an independent consultant for more than three decades, in business transformation, enterprise architecture and knowledge management. His clients in Europe, Australasia and the Americas cover a broad range of industries including banking, utilities, manufacturing, logistics, engineering, media, telecoms, research, defence and government. He has a special interest in architecture for non-IT-centric enterprises, and integration between IT-based and non-IT-based services.

Editorial Review

Users Review

From reader reviews:

Raymond Simmons:

What do you regarding book? It is not important to you? Or just adding material when you really need something to explain what your own problem? How about your time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everybody has many questions above. They should answer that question simply because just their can do which. It said that about e-book. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Mapping the enterprise: Modelling the enterprise as services with the Enterprise Canvas to read.

Janice Smith:

Nowadays reading books be a little more than want or need but also become a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The information you get based on what kind of guide you read, if you want send more knowledge just go with schooling books but if you want feel happy read one with theme for entertaining such as comic or novel. The actual Mapping the enterprise: Modelling the enterprise as services with the Enterprise Canvas is kind of reserve which is giving the reader unpredictable experience.

Catherine Stoltenberg:

Playing with family in a park, coming to see the marine world or hanging out with buddies is thing that usually you could have done when you have spare time, then why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Mapping the enterprise: Modelling the enterprise as services with the Enterprise Canvas, you are able to enjoy both. It is good combination right, you still wish to miss it? What kind of hangout type is it? Oh come on its mind hangout guys. What? Still don't get it, oh come on its known as reading friends.

Sean Ward:

Reading a book to become new life style in this season; every people loves to examine a book. When you learn a book you can get a lot of benefit. When you read publications, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what forms of

book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and also soon. The Mapping the enterprise: Modelling the enterprise as services with the Enterprise Canvas provide you with a new experience in reading a book.
