The Developmental Psychology of Personal Relationships (Social & Personal Relationships) From Wiley

These are the first two volumes in an important new five-book series derived from sections of the international bestseller, *Handbook of Personal Relationships, Second Edition*, by Steve Duck. The purpose of the series is to allow professionals and students easy access to state-of-the-art theory and practice in specific areas of personal relationships—an increasingly popular field of research and therapeutic practice that focuses on the processes by which individuals relate to each other in social and family settings. Each paperback is an updated and expanded version of its corresponding section in the *Handbook*, and contains several new chapters that provide a greater breadth of coverage.

Editorial Review

From the Back Cover

This book is concerned not with the way specific relationships develop but rather with the way individuals learn to relate to other people. A basic premise guiding theory and research in this area is that the most formative learning experiences are relationship experiences. Our ways of relating to other people are largely determined by the relationships in which we have participated.

Attempts to understand the nature of the processes involved in learning to relate to others have gradually been moving beyond accounts of specific types of relationships (parent-child, peer, sibling) to include the identification of linkages across different relationships. This has stimulated new ideas and new research on the processes of relationship learning. The contributors to this volume review these recent advancements and point to challenging directions for the future.

This volume provides a useful reference for professionals whose research and/or clinical practice focuses on personal relationships. This book is also intended for advanced students in the areas of developmental psychology, clinical and counseling psychology, communication studies, family studies, and sociology.

Users Review

From reader reviews:

Curtis Locke:

What do you concentrate on book? It is just for students as they are still students or the idea for all people in the world, what the best subject for that? Just you can be answered for that issue above. Every person has different personality and hobby for each and every other. Don't to be compelled someone or something that they don't desire do that. You must know how great as well as important the book The Developmental Psychology of Personal Relationships (Social & Personal Relationships). All type of book are you able to see on many sources. You can look for the internet options or other social media.

Jeff Farley:
