Analysis of Complex Networks: From Biology to Linguistics From Wiley-Blackwell

Mathematical problems such as graph theory problems are of increasing importance for the analysis of modelling data in biomedical research such as in systems biology, neuronal network modelling etc. This book follows a new approach of including graph theory from a mathematical perspective with specific applications of graph theory in biomedical and computational sciences. The book is written by renowned experts in the field and offers valuable background information for a wide audience.

Editorial Review

About the Author

Matthias Dehmer studied mathematics at the University of Siegen (Germany) and received his Ph.D. in computer science from the Technical University of Darmstadt (Germany). Currently, he is with the Vienna University of Technology (Austria) in the department of Discrete Mathematics and Geometry. His research interests are Graph Theory, Information Theory, Computational Biology and Machine Learning.

Frank Emmert-Streib studied Physics at the University of Siegen (Germany) and received his Ph.D. in Theoretical Physics from the University of Bremen (Germany). He was postdoctoral research associate at the Stowers Institute for Medical Research (Kansas City, USA) in the Department for Bioinformatics and is currently senior research fellow at the University of Washington (Seattle, USA) in Biostatistics and Genome Sciences. His research interests are in the field of Computational Biology, Biostatistics, Machine Learning and Information Theory and Statistical Learning.

Users Review

From reader reviews:

Orlando Hernandez:

What do you regarding book? It is not important along with you? Or just adding material when you want something to explain what the one you have problem? How about your spare time? Or are you busy man? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have time? What did you do? All people has many questions above. They have to answer that question mainly because just their can do that. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on jardín de infancia until university need this particular Analysis of Complex Networks: From Biology to Linguistics to read.

Johnnie Nystrom:

Do you have something that you enjoy such as book? The e-book lovers usually prefer to decide on book like comic, limited story and the biggest some may be novel. Now, why not attempting Analysis of Complex Networks: From Biology to Linguistics that give your entertainment preference will be satisfied by simply reading this book. Reading addiction all over the world can be said as the opportunity for people to know world considerably better then how they react in the direction of the world. It can't be said constantly that reading practice only for the geeky man or woman but for all of you who wants to become success person. So , for all you who want to start examining as your good habit, you could pick Analysis of Complex Networks: From Biology to Linguistics become your own personal starter.

Morris Reyna:

This Analysis of Complex Networks: From Biology to Linguistics is completely new way for you who has

curiosity to look for some information given it relief your hunger of information. Getting deeper you on it getting knowledge more you know or you who still having small amount of digest in reading this Analysis of Complex Networks: From Biology to Linguistics can be the light food for you personally because the information inside that book is easy to get by anyone. These books build itself in the form and that is reachable by anyone, sure I mean in the e-book web form. People who think that in book form make them feel drowsy even dizzy this publication is the answer. So there is absolutely no in reading a reserve especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the idea! Just read this e-book variety for your better life along with knowledge.

Raymond Murray:

What is your hobby? Have you heard this question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person including reading or as studying become their hobby. You have to know that reading is very important as well as book as to be the issue. Book is important thing to add you knowledge, except your own personal teacher or lecturer. You will find good news or update with regards to something by book. A substantial number of sorts of books that can you take to be your object. One of them is niagra Analysis of Complex Networks: From Biology to Linguistics.
