Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches From Wiley

Monitoring Land Supply with Geographic Information Systems Theory, Practice, and Parcel-Based Approaches

Monitoring the supply of buildable land and its capacity to accommodate growth within urbanizing regions is an increasingly important component of urban planning and growth management. Recent developments in Geographic Information Systems (GIS) have opened up new opportunities for local and regional government to monitor land supply and capacity. Based on a study sponsored by the Lincoln Institute of Land Policy, this book reviews the state of the art in land monitoring, particularly as it benefits from the introduction of GIS data and analysis capabilities at the level of individual land parcels.

Monitoring Land Supply with Geographic Information Systems addresses:

- * Technical and methodological frameworks for data collection and analysis as well as applications to a range of policy concerns
- * Case studies of successful land monitoring programs, including Portland, Oregon; Montgomery County, Maryland; and the Puget Sound Regional Council in Washington
- * Thematic topics ranging from database design to urban simulation modeling to organizational contexts
- * Detailed findings of a national survey of land supply monitoring programs

This guide presents a comprehensive, timely, and critical overview of a fast-emerging field of planning and policy analysis. It provides an invaluable resource to professionals, including land use and economic development planners, GIS analysts, local government officials, and private developers.

This guide presents a comprehensive, timely, and critical overview of a fast-emerging field of planning and policy analysis. It provides an invaluable resource to professionals, including land use and economic development planners, GIS analysts, local government officials, and private developers.

About the Author

ANNE VERNEZ-MOUDON is Professor of Urban Design and Planning at the University of Washington.

MICHAEL HUBNER is an urban and regional planner in Seattle and Consultant to the Suburban Cities Association of King County.

Users Review

From reader reviews:

Diane Williams:

The book Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches make one feel enjoy for your spare time. You can use to make your capable far more increase. Book can to get your best friend when you getting strain or having big problem together with your subject. If you can make studying a book Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches for being your habit, you can get much more advantages, like add your personal capable, increase your knowledge about several or all subjects. You could know

everything if you like open up and read a guide Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches. Kinds of book are several. It means that, science guide or encyclopedia or other individuals. So , how do you think about this publication?

Kevin Jakubowski:

This Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches tend to be reliable for you who want to be a successful person, why. The explanation of this Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches can be on the list of great books you must have is usually giving you more than just simple reading through food but feed an individual with information that might be will shock your earlier knowledge. This book is actually handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed kinds. Beside that this Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we know it useful in your day task. So , let's have it appreciate reading.

Gerald Morin:

This Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches is new way for you who has curiosity to look for some information given it relief your hunger info. Getting deeper you onto it getting knowledge more you know or else you who still having tiny amount of digest in reading this Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches can be the light food in your case because the information inside this book is easy to get by means of anyone. These books build itself in the form which can be reachable by anyone, yes I mean in the e-book application form. People who think that in guide form make them feel drowsy even dizzy this reserve is the answer. So there is not any in reading a publication especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the item! Just read this e-book type for your better life and also knowledge.

Desiree Grajeda:

Do you like reading a e-book? Confuse to looking for your selected book? Or your book ended up being rare? Why so many problem for the book? But virtually any people feel that they enjoy for reading. Some people likes reading, not only science book but in addition novel and Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches or perhaps others sources were given knowledge for you. After you know how the good a book, you feel wish to read more and more. Science publication was created for teacher or maybe students especially. Those publications are helping them to include their knowledge. In various other case, beside science publication, any other book likes Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches to make your spare time more colorful. Many types of book like this.
