Teach Your Children Well (Enhanced Edition): Why Values and Coping Skills Matter More Than Grades, Trophies, or "Fat Envelopes" By Madeline Levine PhD

In 7 exclusive video chats found only in the enhanced e-book edition of *Teach Your Children Well*, Dr. Madeline Levine serves as psychologist, mentor and fellow parent, offering practical advice, breaking down modern parenting myths and asking challenging questions to make you a better parent.

Psychologist Madeline Levine brings together cutting-edge research and thirty years of clinical experience to explode once and for all the myth that good grades, high test scores, and college acceptances should define the parenting endgame.

Parents, educators, and the media wring their hands about the plight of America's children and teens—soaring rates of emotional problems, limited coping skills, disengagement from learning and yet there are ways to reverse these disheartening trends. *Teach Your Children Well* acknowledges that every parent wants successful children. However, until we are clearer about our core values and the parenting choices that are most likely to lead to authentic, and not superficial, success, we will continue to raise exhausted, externally driven, impaired children who believe they are only as good as their last performance. Real success is always an inside job, argues Levine, and is measured not by today's report card but by the people our children become fifteen or twenty years down the line.

Refusing to be diverted by manufactured controversies such as "tiger moms versus coddling moms," Levine confronts the real issues behind the way we push some of our kids to the breaking point while dismissing the talents and interests of many others. She shows us how to shift our focus from the excesses of hyperparenting and the unhealthy reliance on our children for status and meaning to a parenting style that concentrates on both enabling academic success as well as developing a sense of purpose, well-being, connection, and meaning in our

children's lives.

Teach Your Children Well is a call to action. And while it takes courage to make the changes we believe in, the time has come, says Levine, to return our overwrought families to a healthier and saner version of themselves.

From the Back Cover

Psychologist Madeline Levine brings together cutting-edge research and thirty years of clinical experience to explode once and for all the myth that good grades, high test scores, and college acceptances should define the parenting endgame.

Parents, educators, and the media wring their hands about the escalating rates of emotional problems and lack of real engagement with learning found so frequently among America's children and teens. Yet there are ways to reverse these disheartening trends. Until we are clearer about our core values and the parenting choices that are most likely to lead to authentic, and not superficial, success, we will continue to raise exhausted, externally driven, and emotionally impaired children who believe they are only as good as their last performance.

Confronting the real issues behind why we push some of our kids to the breaking point while dismissing the talents and interests of many others, Levine shows us how to shift our focus from the excesses of hyperparenting and the unhealthy reliance on our children for status and meaning to a parenting style that concentrates on both enabling academic success and developing a sense of purpose, well-being, and connection in our children's lives.
